About Me

Military experience in the maintenance of Sikorsky helicopters complemented with a **cybersecurity** background. Natural **curiosity** in JavaScript applications with **desire** to master and experiment with new technologies such as MeteorJS and ReactJS.

Education

General Assembly July 2015 — September 2015
Web Development Immersive

Ashford University September 2008 — July 2012
Bachelors in Communication Studies

Experience

US Navy 2004 — 2013
Technician

- Maintenance in Electronics and Engineering
- Provided maintenance on 30 high value Sikorsky helicopters
- Utilized in-house electronic products for evaluation and consulting of military cyber security

Lootcrate 2013 — 2015
Fullfillment Specialist

- Delegated the shipment of 400,000+ subscription boxes per month
- Operated ForkLift Machinery for logistics allocation
- Managed Inventory of surplus to enhance workflow of product shipment

Projects

Random Fate — HTML/CSS/JavaScript

- Simple card matching game with giphy visualization

KnowMe — Ruby on Rails

- Simple CRUD application similar to a blog. Primary purpose is to encourage users to build rapport with one another by sharing personal details with each other

Socket2Me — NodeJS

- Team collaboration application providing navigation and location services solution utilizing websockets for user to user connection.
